

Communism collapsed (with a little help). Capitalism was to be the Great Saviour of the World, but it has shown itself not only a false but a very dangerous god. What can We the People do to find a path to a sane and safe society?

GREEN ISLAND BOOK I
Greenways

The Liberal and Conservative parties have received a huge surprise from the voters of Prince Edward Island - after one too many years of blatant cronyism and corruption and incompetence, they get turfed in favor of a group of Independents. Together this non-corporate coalition undertakes to fulfill their election promises and turn PEI into a modern Green Island - a government actually of, by and for the people, rather than one dominated by and run for the benefit of corporate puppets and bankers.

But the corporate puppets and bankers are not happy with this turn of events, and undertake, with the help of their enforcement arm the American military, a little regime change operation.

But the regime changers get a bit of a surprise this time - an unexpected show of support for Green Island from the new Nordic Union, who decree that they will no longer accept the 'right' of the Americans to interfere with sovereign governments they don't like, just because they can and they want to. Asskicking happens.

And meanwhile things get really interesting - the Universal Incorporate decides this would be a good time to put all of humanity on trial for their overall barbarism throughout their time of dominance on this planet, and their endless attacks on Truth and Beauty and Justice.

And then - well. It all plays out on Green Island.

Come join the revolution.
